Restoration Ability

150° Wide Angle

Wide-angle of 150° front and rear, large screen recording more road conditions

Enhanced Stabilization

Providing double anti-shake hold, effectively isolating the motorcycle riding shake, presenting a smooth effect like the clouds.

Anti-Shake On

Anti-Shake Off

Day and Night Mode Automatic Switching

No manual operation required, the system automatically switches to Night Mode in response to the scene.

*To meet the dual storage requirements, be sure to select a genuine Class10/U3 level or higher memory card *128G storage (no memory card included in the package, please purchase it in the store).

Not just fast

Seamless connectivity, stable and smooth

Instant Connect Ready to Go!

The vehicle will automatically initiate a mirroring connection without manual operation, and the background will start recording the ride, greatly reducing the operation before riding, helping you start a convenient journey easily.

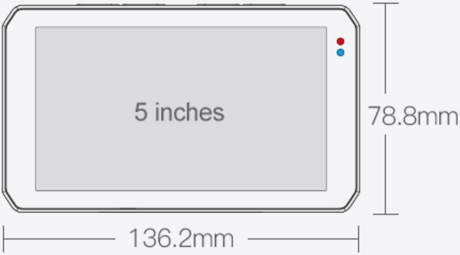
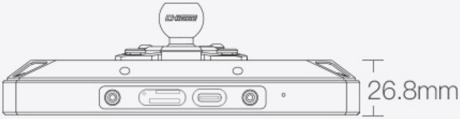
Technical Parameters

TECHNICAL PARAMETERS



5 inches
78.8mm
136.2mm



Basic Parameters

Working voltage: 12-18V/DC

Working temperature: -20-65°C

Product Dimensions: 136.2*78.8*26.8mm

Weight: 310g

Waterproof Rating: IP67

RAM: 4Gb

Built-in Storage: 32GB EMMC

Operating System: CGOS(Linux)

SD Card Support: 256GB

Bluetooth 1: Supports BLE 5.0 for

Screen size: 5 inches

433MHz: FSK / Tire Pressure Reception

LCD Material: IPS

Brightness: 1000Nit

Peak Brightness: 1200Nit

Automatic Brightness: Supported

Touch: Supported

WIFI: Supports 2.4/5.8G

GPS: External 10HZ GPS Module Supported GPS + BeiDou Satellite

connection to mobile	Bluetooth 2:Supports BLE50 for connecting headphones and devices

Camera Parameters

Image Sensor: IMX307

Resolution: 1920*1080

Frame rate: 30FPS

Lens Angle: D136.6° (H115.6°, V61.6°)

Lens Structure: 2 Glass + 4 Plastic + 1 IR-CUT f=3.0mm

Does it support HDR: Yes.

Camera size: 45*35*56mm

Camera Weight: 80g

Working Voltage: 5V

Front Camera Cable Length: 1M; Rear Camera Cable Length: 2.5m
